

SESSION-10:

Tasks

1.

Declare a string variable called songTitle and assign it the value 'Tum Hi Ho'. Print the length of the string using strlen().

```
#include <stdio.h>

#include <string.h>

int main() {

    char songTitle[] = "Tum Hi Ho";

    printf("Song Title: %s\n", songTitle);

    printf("Length: %lu\n", strlen(songTitle));

    return 0;

}
```

```
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> gcc task1_string.c -o task1_string
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> .\task1_string.exe
Song Title: Tum Hi Ho
Length: 9
```

2.

Take input for two usernames (as strings) and compare them using strcmp(). Display whether they are the same or different.

```
#include <stdio.h>

#include <string.h>

int main() {

    char username1[50], username2[50]

    printf("Enter first username: ");

    fgets(username1, sizeof(username1), stdin);
```

```

username1[strcspn(username1, "\n")] = '\0';
printf("Enter second username: ");
fgets(username2, sizeof(username2), stdin);
username2[strcspn(username2, "\n")] = '\0';
if (strcmp(username1, username2) == 0) {
    printf("Usernames are the same.\n");
} else {
    printf("Usernames are different.\n");
}
return 0;
}

```

```

PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> gcc task2_compare.c -o task2_compare
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> .\task2_compare.exe
Enter first username: RUSHI
Enter second username: rushi
Usernames are different.
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> .\task2_compare.exe
Enter first username: rushi
Enter second username: rushi
Usernames are the same.

```

3.

Copy the string 'Flipkart' into another string variable called shoppingApp using strcpy(), then print the value of shoppingApp.

Hint: Make sure to declare enough space for the destination string.

```
#include <stdio.h>
```

```
#include <string.h>
```

```
int main() {
```

```
    char shoppingApp[20];
```

```
    strcpy(hoppingApp, "Flipkart");
```

```

printf("Shopping App: %s\n", shoppingApp);

return 0;

}

```

```

PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> gcc task3_copy.c -o task3_copy
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> .\task3_copy.exe
Shopping App: Flipkart

```

4.

Build a small script that takes the user's full name as input and creates a username by copying only the first 5 characters using strcpy(). Print the generated username.

Constraint: If the name is shorter than 5 characters, use the full name as the username.

```

#include <stdio.h>

#include <string.h>

int main() {
    char fullName[100];
    char username[6];
    char firstFive[6];
    printf("Enter your full name: ");
    fgets(fullName, sizeof(fullName), stdin);
    fullName[strcspn(fullName, "\n")] = '\0';
    if (strlen(fullName) <= 5) {
        strcpy(username, fullName);
    } else {
        strncpy(firstFive, fullName, 5);
        firstFive[5] = '\0';
        strcpy(username, firstFive);
    }
}

```

```
printf("Username: %s\n", username)

return 0;

}
```

```
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> gcc task4_username.c -o task4_username
PS C:\Users\SIDDHI\OneDrive\Desktop\C_Assignment> .\task4_username.exe
Enter your full name: rushi patel
Username: rushi
```
